Monthly Report

PAR 214

30 Apr 66

SUBJECT: Roller Transport Processor (12-Inch)

TASK/PROBLEM

1. Design and fabricate a versatile self-threading photographic processor capable of handling both cut sheet and continuous webs of photographic material and adaptable to a process yielding either standard negative or reversal images. Interchange between processes to be accomplished with a minimum of effort.

DISCUSSION

2. By message 4132, dated 14 Apr 66, the contractor requested permission to close the subject PAR.

PLANNED ACTIVITY

3. None
